

HTI Automation

For more than 20 years, we at HTI have been developing customized solutions for laboratory and production automation for and with our customers. Our engineering services and products contribute significantly to the success of our customers. With the X-TubeProcessor® series, we flexibly combine established technologies and processes such as liquid handling, screwing or labeling in one device. Thanks to high quality standards, innovative solutions and our many years of expertise, we are now a partner for healthcare and diagnostics companies all over the world.

Shape the future of laboratory automation with us – from the initial idea to successful implementation for the customer.

For the management of our customer and development projects we are looking for the next possible date:

Project manager for customer and development projects (m/f/d)

Your tasks:

- Responsibility for exciting and technologically demanding customer and development projects
- Central point of contact for our customers – from the initial request to successful implementation
- Active design and coordination of customer requirements and development of suitable solutions
- Ensuring deadlines, budgets and quality targets are met
- Connecting internal teams and international clients to a unified project foundation
- Coordination and integration interdisciplinary teams from development, software, design, production and service
- Interface between customer, technology and internal departments
- Conducting project meetings, presentations and reviews
- Early detection of risks and proactive initiation of measures
- Active involvement in shaping our project processes and solutions

Youre profile:

- Completed studies in the field of engineering, industrial engineering, computer science or comparable
- Experience in project management, ideally in a technical environment
- Enthusiasm for complex technical systems and innovative solutions
- Ability to translate customer requirements into viable technical concepts
- Structured and independent way of working
- Strong communication skills and confident demeanor
- Ability to bring together people, teams, and diverse perspectives
- Team spirit, initiative and assertiveness
- Good written and spoken German and English skills

What we offer you in return:

Your perspective at HTI:

- Exciting projects at the interface of technology, innovation and healthcare
- Collaboration with international clients and interdisciplinary teams
- The opportunity to actively take responsibility and make things happen
- Short decision-making processes and plenty of creative freedom
- A responsible and varied job in a collegial team

General conditions:

- Permanent position with performance-related pay
- A motivating working environment in a family-run, solidly growing company
- Individual training and development opportunities

Equipment & Benefits:

- Modern work equipment
- JobRad offer
- EGYM Wellpass

Catering & extras:

- Free drinks, tea and coffee
- Free lunch at the head office in Ebersberg

Please do not hesitate to contact us for further information.
